Duration	7 mins 19 secs
Grade	**15.00** out of 15.00 (**100**%)

Question **1**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

- a. In the right sublist ✓
- b. At the beginning of the list
- c. In the left sublist
- d. In the middle of the list

Question **2**

Correct

Mark 1.00 out of 1.00

In linear search, if the target element is not found in the list, what is the result?

- a. The first element is returned
- b. An error is raised
- c. The search is considered unsuccessful ✓
- d. The last element is returned

Question **3**

Correct

Mark 1.00 out of 1.00

In which situation is linear search more efficient than binary search?

- a. When the list is small and sorted
- b. When the list is large and unsorted
- c. When the list is small and unsorted ✓
- d. When the list is large and sorted

Question **4**

Correct

Mark 1.00 out of 1.00

_____sort is the simplest sorting algorithm that works by repeatedly swapping the adjacent elements in case they are unordered in n-1 passes.

a. Selection

b. Insertion

c. Complexity

d. Bubble ✓

Question **5**

Correct

Mark 1.00 out of 1.00

What type of search would be most appropriate for finding an element in a list that is frequently updated?

a. Interpolation search

b. Binary search

c. Linear search ✓

d. Hash search

Question **6**

Correct

Mark 1.00 out of 1.00

In a linear search, how many comparisons are made in the worst-case scenario to find an element in a list of size n?

a. n/2

b. 1

c. n ✓

d. log n

Question **7**

Correct

Mark 1.00 out of 1.00

In linear search, how is the element searched?

- a. By dividing the list into halves
- b. By comparing each element in the list sequentially ✓
- c. By sorting the list first
- d. By using a hash function

Question **8**

Correct

Mark 1.00 out of 1.00

Which method of searching involves sequentially comparing each element until a match is found?

- a. Binary search
- b. Jump search
- c. Linear search ✓
- d. Hashing

Question **9**

Correct

Mark 1.00 out of 1.00

Which of the following is a conventional searching technique?

- a. Binary search
- b. Hashing
- c. Linear search ✓
- d. Dynamic search

Question **10**

Correct

Mark 1.00 out of 1.00

If a list contains 1000 elements, how many comparisons would a binary search typically make in the worst case?

- a. 100
- b. 10 ✓
- c. 500
- d. 1000

Question **11**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

a. Sorting elements in a list
b. Inserting elements into a list
c. Determining whether an element is present in a list ✓
d. Deleting elements from a list

Question **12**

Correct

Mark 1.00 out of 1.00

Which of the following is a limitation of binary search?

a. It does not work with negative numbers
b. It is slower than linear search for small lists
c. It can only be applied to large lists
d. It requires the list to be sorted ✓

Question **13**

Correct

Mark 1.00 out of 1.00

During a linear search, what is the maximum number of comparisons needed to find an element in a list of size n?

a. n-1
b. n/2
c. log n
d. n ✓

Question **14**

Correct

Mark 1.00 out of 1.00

Which of the following best describes the process of a linear search?

a. Dividing the list in half repeatedly
b. Sorting the list before searching
c. Checking each element sequentially ✓
d. Skipping every second element

Question **15**

Correct

Mark 1.00 out of 1.00

Which of the following is a type of searching method?

a. Quick search
b. Merge search
c. Linear search ✓
d. Bubble search
